EU Cosmetic Compliance Checklist:

Labeling & Packaging

(EC 1223/2009)

Schlafender Hase®

- ☐ **Interpret and apply EC 1223/2009 requirements, including latest amendments** and related chemical regulations (REACH, CLP, POPs).

- ☐ **Verify ingredient compliance** — check for restricted/banned substances, assess safety data, flag nanomaterials, and confirm correct "nano" labelling.

- ☐ **Prepare and maintain the Product Information File (PIF)**, including Cosmetic Product Safety Report (CPSR) and manufacturing method (GMP).

- ☐ **Complete CPNP notification** before placing products on the EU market.

- ☐ **Ensure accurate and compliant label content** — product name, Responsible Person details, country of origin, nominal content, durability/PAO, precautions, batch number, function, and ingredient list in correct order.

- ☐ **Confirm required symbols** are present, correct, and legible (hourglass, PAO jar, "Refer to leaflet" icon).

- ☐ **Validate product claims** (e.g., sustainability, allergen-free, hypoallergenic) are truthful, substantiated, and consistent across packaging and e-commerce.

- ☐ **Maintain brand integrity** while meeting regulatory content and formatting rules.

- ☐ **Check print and packaging accuracy** — artwork matches approved content, colours and legibility are correct, and no information is missing.

- ☐ **Coordinate across teams** to ensure updates (e.g., formula change, label translation, regulatory amendment) are implemented consistently across all markets.
